Education

University of Texas at Austin — Austin, TX
Bachelor of Science in Computer Science, Minor in Business — *May 2028*
***Relevant Coursework**: Operating Systems, Computer Architecture, Data Structures, Algorithms, Software Engineering*

Experience

PwC — Oct. 2026 – Nov. 2026
AI Engineering Intern — *Austin, TX*
- Saved tax team 15+ hrs/week in pilot by chunking LLC agreements into schema-locked LLMs for ownership terms
- Processed 150+ page agreements in <5 min fanning chunks on Service Bus to workers w/ idempotent retries
- Auto-accepted 80%+ of fields at 98% accuracy on 200+ agreements by checking LLM citations against clauses

Visa — May 2026 – Aug. 2026
Software Engineering Intern — *Austin, TX*
- Cut risk suite onboarding from 3 mos to 3 days in pilot by deploying agent & notif services on EKS Fargate & RDS
- Guaranteed crash-safe IAM writes & notifs by committing both atomically via a transactional Postgres outbox
- Delivered 16K+ notifs at-least-once by reclaiming crashed Redis Streams worker jobs w/ backoff retries & a DLQ

AfterQuery (YC W25) — Oct. 2025 – May 2026
AI Engineering Intern — *Remote*
- Lifted Manus AI's browser-agent accuracy 18% by building an S3 artifact store to replay bad/failed agent tool calls
- Persisted each agent action's DOM snapshot, pre/post screenshots & HAR logs from K8s Playwright pods to S3
- Eliminated corrupt replays across pod crashes by isolating retries in per-attempt S3 prefixes & Postgres txns

Profluento AI — Aug. 2025 – Oct. 2025
Co-Founder & CTO — *Austin, TX*
- Raised $100K; engineered a lead scoring engine to surface high-net-worth prospects for wealth management firms
- Onboarded 15+ firms by scoring LinkedIn users with a Node.js weighted-matrix model over 10+ normalized signals
- Reduced paid profile enrichments by 80% using async job routing on Cloudflare Queues with regional KV caching

CDK Global — Jun. 2025 – Aug. 2025
Software Engineering Intern — *Austin, TX*
- Enabled full IAM control across 44K+ dealerships by leading implementation of CDK IAM's "Super Admin" role
- Reduced unauthorized access to near-zero in pilot through per-request auth built with Node.js & DynamoDB
- Eliminated admin-audit gaps across 10K+ updates/week by integrating IAM audit logging & change tracking

Projects

KillMyCluster: A Chaos-Tested Raft KV | *Go, gRPC, Protobuf, Docker, Prometheus, Grafana* — Aug. 2026
- Hosting a public 7-node Raft KV that survives 1.5K visitors/mo killing live nodes, re-electing leaders under 3s
- Sustaining 1K+ writes/s & 1K+ linearizable reads/s over gRPC to a crash-safe WAL, live on public Grafana

Faultline: A Microservice Replay Engine | *Rust, Arrow, Axum, WebSockets, React, TypeScript* — Jul. 2026
- Serving a public replay engine that rewinds a microservice outage, tracing faults across a live dependency graph
- Rebuilding every service's state at any instant in under 50ms by interval-joining Arrow streams on event time

LapSynk: The Formula 1 AI Copilot | *Cloudflare, Gemini, ElevenLabs, TypeScript, React, Node.js* — Oct. 2025
- Placed 3rd at HackTX 2025 (733 hackers) with a telemetry-driven message prioritization engine for race engineers
- Delayed non-critical msgs up to 5s by implementing message deferral across traffic density, G-force load, & braking

Technical Skills

Languages: Python, Go, TypeScript, Rust, SQL, JavaScript, Bash, C, Java, C++
Distributed Systems: gRPC, Protobuf, Raft, Transactional Outbox, WAL, Linearizable Reads, DLQs
AI: Claude Code, Claude Agent SDK, LangGraph, Structured Outputs, Tool Calling, LLM Evals, RAG, Fine-tuning
Tools & Infrastructure: AWS (EKS, RDS, S3, DynamoDB), Kubernetes, Docker, Azure Service Bus, Prometheus, Grafana, Cloudflare, WebSockets, Linux, Git, GitHub Actions (CI/CD), REST APIs, Vercel, Kafka, Terraform
Databases: PostgreSQL, Redis, DynamoDB, Redis Streams, Supabase, Vector Search (pgvector)
Frameworks & Libraries: React, Node.js, Next.js, FastAPI, Playwright, Apache Arrow, Axum, Spring Boot
