Relevant Coursework: Data Structures, Algorithms & Complexity, Software Engineering, Operating Systems, Computer Architecture, Object Oriented Programming, Discrete Math, Linear Algebra, Calculus II/III

EXPERIENCE

Visa

May 2026 – Aug. 2026

Software Engineering Intern @ VAS (Value Added Services)

Austin, TX

- Instrumented Google Analytics across Protect for Banks to analyze user behavior, tagging 100K+ monthly sessions
- Built an agentic fraud data Board Builder w/ Hadoop-pipelined GA data, surfacing graphs for 2K+ bank clients
- Engineered LLM insights over GA, converting usage patterns into ranked sales targets across 150+ bank clients

AfterQuery (YC W25)

Oct. 2025 – May 2026

AI Evaluation Intern

San Francisco, CA

- Built multi-step eval pipelines to benchmark Manus AI tool calls (function selection, argument parsing, retry logic)
- Measured tool-call success rate by developing Python harnesses w/ deterministic ground truths & diff-based scores
- Generated eval datasets & failure-mode reports, feeding back into pipeline & refining model at 2M+ user scale

Profluento AI

Aug. 2025 – Oct. 2025

Co-Founder & CTO

Austin, TX

- Acquired \$100K+ in data grants and backing from LvlUp Ventures to build an AI platform for wealth managers
- Architected data pipelines & AI CRMs for 15+ firms, growing qualified lead conversion rates from 1-3% to 8-10%
- Integrated MCP-backed agents to automate client outreach using ranked leads, firm context, & connection history

CDK Global

Jun. 2025 – Aug. 2025

Software Engineering Intern @ Fortellis Team

Austin, TX

- Led implementation of Role-Based Access Control for 44K+ Dealerships via CDK IAM's "Super Admin" role
- Enabled per-request authorization w/ Node.js APIs & DynamoDB schemas for role lookups & permission storage
- Implemented audit logging & change tracking for 10K+ role updates/week, enabling admin decision traceability

PROJECTS

Wealth Manager Lead Scoring Engine | *Supabase, Node.js, Cloudflare, Python*

Oct. 2025

- Deployed an API processing 10M+ LinkedIn profiles to predict high net worth users & match to wealth managers
- Developed a scoring system combining weighted matrices and 9+ demographic signals to rank 10K+ user profiles
- Converted scoring outputs into 150+ verified matches for wealth managers across firm fit & outreach criteria

LapSynk: Formula 1 AI Copilot | *Cloudflare, Gemini, ElevenLabs, TypeScript, React, Node.js*

Oct. 2025

- Placed 3rd in NorthMark Compute & Cloud track at HackTX 2025 out of 733 hackers (1 of 20 winners)
- Built a real-time telemetry dashboard and AI voice agent to optimize comms timing and driver feedback
- Used Cloudflare Workers to simulate race, Gemini to analyze driver workload, and ElevenLabs for voice responses
