EDUCATION

University of Texas at Austin

Austin, TX

Bachelor of Science in Computer Science, Minor in Business

May 2028

Relevant Coursework: Data Structures, Algorithms, Software Engineering, Operating Systems, Computer Architecture

EXPERIENCE

PwC

Oct. 2026 – Nov. 2026

AI Engineering Intern

Austin, TX

- Incoming Fall 2026 on PwC's TIDE (Tax Innovation & Delivery Experience) team

Visa

May 2026 – Aug. 2026

Software Engineering Intern

Austin, TX

- Designed a LangGraph-based onboarding agent to turn plain-English requests into fully provisioned IAM users
- Implemented a pgvector-based service recommender over 403K enrollment records, reaching 91% top-1 accuracy
- Built a Redis Streams notification pipeline with retries & dead-lettering, pushing 16K+ status updates to Teams

AfterQuery (YC W25)

Oct. 2025 – May 2026

AI Evaluation Intern

San Francisco, CA

- Built evaluation pipelines to benchmark Manus AI tool calls (function selection, argument parsing, retry logic)
- Developed Python harnesses to measure tool-call success rate with deterministic ground truths & diff-based scores
- Funneled eval datasets & failure-mode reports into agent retraining, refining tool-call accuracy at 2M+ user scale

Profluento AI

Aug. 2025 – Oct. 2025

Co-Founder & CTO

Austin, TX

- Acquired \$100K+ in data grants and backing from LvlUp Ventures to build an AI platform for wealth managers
- Launched a scoring engine for 15+ firms, surfacing 150+ verified high-net-worth leads from filtered LinkedIn data
- Integrated AI outreach workflows using firm context & client history, lifting lead conversion from 1–3% to 8–10%

CDK Global

Jun. 2025 – Aug. 2025

Software Engineering Intern

Austin, TX

- Led implementation of CDK IAM's "Super Admin" role, granting users full IAM control across 44K+ dealerships
- Shipped per-request authorization with Node.js APIs & DynamoDB schemas for role lookups & permission storage
- Integrated audit logging & change tracking for 10K+ role updates/week, enabling admin decision traceability

PROJECTS

Lead Scoring Engine for Profluento AI | Node.js, Cloudflare, Supabase

Oct. 2025

- Scored profiles with a modular Node.js weighted-sum model over 10+ normalized signals to rank top candidates
- Routed user requests through Cloudflare Queue jobs with region-local KV caching, cutting paid API calls by 80%
- Persisted scored profiles to Supabase with retry logic & job-state tracking for partition-tolerant writes on failure

LapSynk: Formula 1 AI Copilot | Cloudflare, Gemini, ElevenLabs, TypeScript, React, Node.js

Oct. 2025

- Placed 3rd in NorthMark Compute & Cloud track at HackTX 2025 out of 733 hackers (1 of 20 winners)
- Built a rule-based engine to score driver workload from telemetry, delaying low-priority radio calls by severity tier
- Simulated live race telemetry over WebSockets on Cloudflare Workers, powering a Gemini + ElevenLabs voice loop

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, Go, C, C++, Bash, SQL

AI & Data Systems: RAG, Vector Search, pgvector, LangChain, LangGraph, LLM Evals, Tool-Call Evaluation

Backend & Cloud: Node.js, Express, FastAPI, Spring Boot, AWS, Cloudflare Workers, Cloudflare Queues, Docker

Databases & Infrastructure: PostgreSQL, Redis, Redis Streams, DynamoDB, Supabase, Kafka, Terraform
